TECHNICAL SKILLS

Languages: Java, Python, C, SQL (MySQL, Oracle Apex), JavaScript, Typescript, HTML/CSS

Frameworks/Applications/Libraries: Playwright, Express, Node.js, Django, Angular, Tailwind, Bootstrap, MySQL Server, MongoDB, POSIX, libfuse, Linux Kernel

Developer Tools: Git, Eclipse, VS Code, MySQL Workbench, Docker

EXPERIENCE

Software Development Intern

June 2026 - Present

Dulcian Inc.

Woodbridge, NJ

- Develop automated testing scripts with Playwright/Python to verify web application behavior
- Refactor legacy scripts to construct resilient, future-proof tests and minimize use of hard-coded solutions
- Document inconsistent functionality to maintain transparent bug tracking and streamline the debugging pipeline
- Collaborate with the development team to maintain a flexible codebase using the Page Object Model pattern

Lab Assistant Tutor

November 2022 - Present

Middlesex College

Edison, NJ

- Provide personalized tutoring for Computer Science students across core programming courses
- Support students in comprehending complex concepts in Java, MIPS Assembly, SQL, and Python
- Maintain campus computer labs, troubleshoot local software issues, and track student attendance

EDUCATION

Rutgers University

New Brunswick, NJ

Master of Science in Computer Science

Jan. 2026 - Ongoing

- Current GPA: 4.00
- Concentration: Systems and Security
- Relevant Coursework: Operating Systems Theory, Computer Networks

Rutgers University

New Brunswick, NJ

Bachelor of Science in Computer Science

Sep. 2023 - May 2025

- 3.96 GPA (Summa Cum Laude)
- Relevant Coursework: Operating Systems Design, Systems Programming

Middlesex College

Edison, NJ

Associate of Science in Computer Science

Sep. 2021 - May 2023

- 3.96 GPA, (Highest Honors)
- Phi Theta Kappa Honors Society inductee
- Recipient of Chambers Award for Academic Excellence

PROJECTS

Auction Placement Website | Jakarta Servlet, Apache HTTP Server, MySQL

- Coordinated a four-person team to design and deploy local auction hosting platform
- Engineered backend features for posting items, bidding, finalizing auctions, and administrative access.
- Optimized database schemas to resolve limitations and maintain flexible conceptual and logical models
- Debugged server hosting issues and servlet output bugs, and produced a live technical demonstration.

Miniature Filesystem | C Standard Library, POSIX Standard library, libfuse

- Engineered a miniature file system utilizing the FUSE library with support for directories and small file storage.
- Implemented Unix-style inode and stat data structures to keep track of file statistics and metadata
- Integrated the FUSE API to ensure file system compatibility with standard kernel system calls for directory navigation and file reading
